

A Review of Grey Literature Cited by Food Loss Law and Policy Scholarship

Supplemental Document: Most Cited Grey Literature Producers

Angela Hackstadt, University at Albany

The most cited grey literature producers are the U.S. Department of Agriculture, the U.S. Environmental Protection Agency, the United Nations, ReFED, and Natural Resources Defense Council. This document lists the sources cited by these organizations.

The information provided here is based on the citations provided in the literature. Different publications use different style guides, so important identifying information was absent from some citations. For instance, some citations do not contain a URL to an online resource.

As noted in the accompanying article, URLs may fall victim to link rot over time. Broken URLs have been omitted from this supplement. However, working URLs may now direct to different information than originally cited or redirect to a new URL and may deteriorate over time.

Wherever possible, a reliable URL has been identified for online resources, whether it was not provided in the original citation or the cited URL no longer works. If a reliable URL to a resource could not be identified with certainty, that information has been omitted.
